

# KR-607B Scale Inhibitor for Barium and Strontium

## Properties:

**KR-607B** is designed for stabilizing of Ba<sup>2+</sup> and Sr<sup>2+</sup>. **KR-607B** can effectively stabilize Ba<sup>2+</sup> and Sr<sup>2+</sup> in water system. **KR-607B** has good scale inhibition effect for calcium carbonate, calcium sulfate, and magnesium sulfate, it can be used in oilfield refill water system and industrial circulating cool system.

## Specification:

| Items                             | Index                    |
|-----------------------------------|--------------------------|
| Appearance                        | Amber transparent liquid |
| Solid content, %                  | 40.0 min                 |
| pH(1% water solution)             | 6.0 min                  |
| Density (20°C), g/cm <sup>3</sup> | 1.10 min                 |

## Usage:

Add **KR-607B** into plastic pool (or box) every day, dilute with water and continuously add into inlet of dosage pump or metering valve (outlet of collecting tank). Dosage of 10-50ppm is preferred (according to quantity of makeup water).

## Package and Storage:

200L plastic drum,IBC(1000L),customers' requirement. Storage for ten months in shady room and dry place.
